Test report

Topic Windmill

Phase *Final*

Table of Contents

1. Test object

Final produced software was tested. We tested that is it ready or do we have some problems before we reveal it to people.
Test environment was use visual studio code and thereto includes add on platformio.

2. Deviations

We don't deviate from the testing plan.
 Everything went as planned.

3. Scope of the testing

We haven't all the stuff what we promised to client and reason for that is the time ended. And we were satisfied to this what we achieved. Our wireless communication was left out.

4. Test results

<Our windmill works as promised. This is the only test report so we can't summary it to others. But we edited code many times and always every time we went to lab. >

5. Assessment

<Test went well and nothing broke. Windmill poles top where the motor was, should have attached better. Maybe use some clue or something else what keep it from moving circle and wiggling around.
